EDDIE FUENTES

NETWORK ENGINEER | NETWORK ADMINISTRATOR | QA ENGINNER

about me

https://efuentesjr.github.io/efuentes.github.io/ (personal website)

Motivated and detail-oriented professional with extensive expertise in Networking and QA Engineering. Proven track record in crafting and implementing robust test plans, showcasing strong problem-solving abilities. Proficient across various technologies, programming languages, and testing platforms, with a keen focus on networking protocols and infrastructure. Possesses excellent communication skills and thrives in collaborative environments. Eager to leverage skills and experience in a Networking or QA Engineering role

EDUACATION

AUSTIN COMMUNITY COLLEGE
AAS Electronics Technology
2005 | Austin, TX

CYBERTEX INSTITUTE of TECHNOLOGY
Network Engineer
2024 | Austin, TX

- CompTIA IT Operations Specialist | 2024
- CompTIA System Support Specialist | 2024
- CompTIA Secure Infrastructure Specialist | 2024
- CompTIA Linux Network Professional | 2024
- Amazon Web Services Could Practitioner | 2024
- CompTIA A+ | 2023
- CompTIA Network+ | 2024
- CompTIA Security+ | 2024
- CompTIA Linux+ | 2024

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA) | 2008
- Cisco Net Academy Hardware Basics | 2023
- Cisco Net Academy OS Basic | 2023
- Cisco Net Academy Networking Basics | 2024
- Cisco Net Academy Python Essentials | 2024
- Cisco Net Academy Engage Stakeholders | 2024
- Corning Fiber Optics Networks | 2008
- Corning Optical Fiber Splicing | 2008
- Corning Unicam Fiber Optic Installation | 2008

professional experience

Luxoft at AT&T Labs – Austin, Texas (December 2021–January 2023)
SENIOR-QA NETWORK ENGINEER

- Created and executed comprehensive test plans for IoT device certification, evaluation, and approval of new wireless prototypes to ensure compatibility with AT&T's networks.
- Reduced post-launch issues by 25% through rigorous testing, early issue identification, and collaboration with cross-functional teams.
- Contributed to successful device launches by addressing potential network integration challenges, enhancing overall device performance.
- Demonstrated proficiency in RF technologies for wireless devices, encompassing 3G, 4G, LTE, and 5G air interface technologies.
- Pioneered the implementation of automated test scripts using tools such as Appium and Selenium, optimizing testing workflows.
- Slashed testing cycle time by 30% and minimized errors, leading to quicker release cycles and improved accuracy.
- Utilized advanced testing platforms like R&S (Rhode & Schwarz), Keysight, Anritsu, and Spirent, aligning with wireless technology standards.
- Employed packet capturing tools like QXDM and IT3 Prove!, in addition to conventional network TAPs, to analyze and diagnose network interactions.
- Conducted thorough compatibility testing of eSIM and SIM cards across various devices, including smartphones, tablets, and IoT devices.
- Tested the performance of eSIM and SIM cards during network roaming scenarios, evaluating seamless transitions between FirstNET and AT&T networks.
- Employed TeraTerm, Putty, and other remote access platforms to establish SSH connections and perform remote logins on devices.
- Utilized Control Center, G&D, V3, and V2 global Sim testing platform to assess device behavior in simulated network environments.
- Managed test execution and defect reporting using HP ALM Quality Center, ensuring comprehensive documentation of testing outcomes.

DATA Vision at Commscope – Austin, Texas (February 2017- July 2020)
QA NETWORK DATA ENGINEER

- Spearheaded the testing of software products utilizing the TR-069 standard to manage Customer Premise Equipment (CPE), serving international Internet clients AT&T, Telstra, Frontier, Telmex, and Sasktel.
- Developed, executed, and documented test cases aligned with customer test plans, ensuring the robust functionality and performance of residential gateways and Wi-Fi extenders.
- Conducted comprehensive testing across various platforms, including Web and Mobile Applications on iOS and Android, blending manual and automated testing methods.
- Proficiently navigated platforms such as ECO Manage, ECO Assist, ECO Collect, ECO Connect, and ECO Self Service to validate feature sets and ensure seamless customer experiences.
- Collaborated seamlessly with cross-functional teams of engineers and designers to rigorously test, validate, and refine new features and functionalities.
- Excelled in diagnosing and reproducing issues reported by clients, meticulously documenting steps for developers, resulting in swift issue resolution.
- Championed defect management and verification, ensuring issues were tracked to closure and that solutions were deployed into production effectively.
- Participated in Software Development Lifecycles (SDLC), enhancing QA methodologies, implementing Test Plan/Test Strategy documents, and driving continuous improvement.
- Leverage test tools including SoapUI, Swagger API, for comprehensive testing coverage. • Showcased proficiency in command-line tools, telnet, ssh, and Linux for seamless interfacing with Residential Gateways (RGs), debugging, and automation testing.
- Maintained meticulous test documentation through eTrac, Jira, and Confluence.

FLEXTRONICS - Austin, Texas (October 2003 – July 2014)
FUNCTIONAL TEST PRODUCT ENGINEER

- Spearheaded support for a range of critical Cisco product lines, including GSR, CAT6K, MGX, Constellation, CRS1, CRS2, CRS3, and Taiko, ensuring their functionality and reliability.
- Demonstrated a relentless drive for process improvement by implementing changes in product design, hardware, and scripts, resulting in enhanced product performance.
- Installed, configured, troubleshooted, and maintained Cisco's servers in a complex test environment, ensuring seamless operations.
- FUNCTIONAL TEST MAINTENANCE SUPERVISOR
- Led a team of equipment maintenance technicians across three shifts, ensuring 24/7 coverage for the entire functional test areas. Conducted yearly performance reviews and provided recommendations for raises and promotions, fostering a culture of growth.
- Ensured all test equipment was consistently maintained, adhering to Flextronics policies and ISO9000 standards for maximum reliability and quality.
- EQUIPMENT MAINTENANCE ENGINEER
- Performed meticulous maintenance and preventive maintenance on all functional test equipment, consistently achieving a minimum of 90% uptime and reliability.
- Actively participated in equipment improvement teams and projects, demonstrating a commitment to enhancing equipment performance and efficiency.
